## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1, 20 and 24, as best understood,** are rejected under 35 U.S.C. 102(b) as being anticipated by Novoselsky 4,733,432.

Novoselsky discloses a mechanism comprising a main drive spindle **(43)** being driven by a power supply **(4)** and rotatable axially; at least one eccentric element **(325)** being in communication with the drive spindle and producing eccentric motion; at least one bearing means surrounding the eccentric element **(5:23-52)**; and at least one drive transmitting element **(327)** being configured to perform an essentially linear movement which is transformed into an orbiting motion of a final drive spindle **(326)**, one of the terminals of the drive transmitting element being connected to the eccentric bearing means and the other terminal to the final drive spindle, the drive transmitting element passing through a drive transferring spindle bearing associated with a supporting piece connected by bearings to the main frame **(Figs. 3-7)**; multiple eccentric elements with drive spindles; and is a cleaning tool **(Figs. 1 and 3-7)**.

***Response to Arguments***

3. Applicant's arguments filed 5/3/10 have been fully considered but they are not persuasive.

Applicant's arguments that the Non-Final Rejection of 2/3/10 should be withdrawn since a final decision as to the allowability of the generic claims has not yet been made is not convincing. In accordance with the requirements of MPEP 1850, since the technical features identified by Applicant do not read over the prior art (US 4,656,788 (to Rhodes et al.)); and the application contains claims directed to more than one species of the generic invention, these species are deemed to lack unity of invention because they are not so linked so as to form a single general inventive concept under PCT Rule 13.1. (See MPEP 1850).

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3723

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
